Luis Gomez

Data analytics for board game publishers

Plus rulebook editing and English–Spanish translation. One person who combines data science, deep game knowledge, and bilingual communication.

ABOUT

Graduate training in data science at **Columbia University**, a **450+ game collection**, and native Spanish. I bring all three to publisher work. I founded the public board game group in Toluca and play regularly in Mexico City and Puebla, so my work is grounded in how real groups learn, choose, and play.

WHAT I CAN TAKE OFF YOUR PLATE

1 **Data analytics** : comparisons and reports you can act on

Decision-ready analysis for teams without an in-house analyst, in plain language:

- **Market & pricing research:** comparable games mapped by price, complexity, player count, and positioning, so MSRP and market fit are set against the real field.
- **Playtest & survey analysis:** recurring confusion, player preferences, and patterns across feedback, separated from one-off opinions.
- **Sales & campaign reporting:** your numbers turned into clear comparisons and simple dashboards. For crowdfunding: comparable-campaign and scenario analysis: what different goals, tiers, and timings imply.

2 **Rulebook editing** : clarity & teachability pass, in English

Not a spellcheck. A playability edit: the rulebook read cold, the way a new group will at the table: ambiguous wording, undefined terms, and rules that appear too late flagged, edge cases answered, and turn structure, setup, and scoring tightened for learnability, with icons, glossary, and examples made consistent.

3 **English → Spanish translation** : native Spanish, game-native terms

Translation that preserves the mechanics, not just the words: terms locked across rulebook, cards, and player aids, with a per-game glossary and neutral Spanish for Spain and Latin America. **No formal translation sample yet:** my Spanish-language work so far is player aids published on BoardGameGeek (see below). I am happy to do a short sample on request.

WHAT I BRING

- **Analytical skills:** graduate data-science training at Columbia: reports built around your decision.
- **Game knowledge:** 450+ games; heavy Euro is home ground: Feld, Gerdts, Luciani. Collection and ratings public on BoardGameGeek as **LuisGomez**.
- **Spanish & community:** native Spanish, bilingual EN–ES; founded the public board game group in Toluca, regular in Mexico City and Puebla groups.

HOW IT WORKS

Freelance, remote, project-based. Start small: one report, a sample edit, or a short translation. **Rates on request.** At Spiel Essen Oct 21–25; remote project work worldwide during and after the fair; based in New York through 2026.
